

INDIVIDUAL PROPERTY/DISTRICT
MARYLAND HISTORICAL TRUST
INTERNAL NR-ELIGIBILITY REVIEW FORM

Property/District Name: H. William Tabler House Survey Number: F:7-130
Project: I-270/US 15 Multimodal Study, Montgomery and Frederick Co. Agency: SHA
Site visit by MHT Staff: X no yes Name Date
Eligibility recommended X Eligibility not recommended
Criteria: X A B X C D Considerations: A B C D E F G None
Justification for decision: (Use continuation sheet if necessary and attach map)

The H. William Tabler House, located at 3020 MD Rte 355, southeast of Urbana, in Frederick County is considered eligible for listing on the National Register of Historic Places under Criteria A and C.

The H. William Tabler property consists of the primary residence, a tenant house and a small barn. The property, established by the locally prominent Tabler family in the mid- to late 19th century survives as an excellent example of a once-prosperous farmstead and thus qualifies for listing under Criterion A.

The main house is a large, two-story, five-bay frame dwelling with a two-story rear ell. The house is set upon a rubble stone foundation and is covered with a cross gable roof with a central gable. The house displays modest Greek Revival detailing, such as a wide cornice and cornice return, as well as a front door transom and narrow sidelights. Folk Victorian elements, such as the turned-post front porch and the center gable was added to give the house a more up-to-date and stylish appearance. The house provides an excellent example of a mid-19th-century vernacular dwelling and illustrates the evolution of a common dwelling form and thus qualifies for the National Register under Criterion C.

The National Register boundaries of the property should include the house and its associated buildings, as well as the surrounding land that is still part of the property and historically associated with it. Although no longer cultivated, this land contributes to an understanding of the rural nature of the property and is important to the property's historic significance.

Documentation on the property/district is presented in: MHT Inventory Files

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The H. William Tabler House is located off MD Route 355, the Urbana Pike, southeast of Urbana where the road crosses Bennett Creek. The property is southeast of the creek. Three buildings are located on the property; the main house, an unpretentious two-story tenant house, and a small barn.

The Tabler House appears to be, under its eclectic blend of stylistic influences, a simple, side-gable, I-house, five bays wide and two bays deep. Paired interior corbelled brick chimneys are situated at each end of the house. The building displays modest Greek Revival elements in the wide boxed-cornice and cornice return. At each corner of the house is a full-height, vernacular Doric pilaster that flares above its capital into the fascia board. The front entry has a transom and narrow sidelights, typical of the Greek Revival, surrounding the door. Fenestration on the southwest elevation is irregular. It appears that the windows on the first, second, and attic floors toward the front of the building have been covered over. A modern wooden deck has been added to the rear of the house and a modern twelve-light "picture" window overlooks the deck.

Over the years, the house has undergone many additions and changes. The first addition appears to be a wing added perpendicular to the original I-house, giving it an L shape. While L-shaped houses were common in nineteenth-century Frederick County, this ell appears to have been an afterthought rather than an original component of the house's design. On the inner corner of the L, the boards of the German siding, which sheathe the residence, do not line up as they logically should do if the house were built as an L initially. It is possible that there was a separate kitchen at the rear of the house that was later attached by means of a dining wing. If this were the case or if the ell were added separately, it appears to have been done at a relatively early date. The foundations of both the I-house and the ell are stone. The ell has a central interior brick chimney with no corbel. A single small window on the attic level is the only window opening of the north elevation of the ell. A cellar door is the only other opening.

Other alterations in adornment followed the Greek Revival. At some later date, probably toward the end of the nineteenth century, Folk Victorian embellishments were added that transformed the house to its present appearance. A center front gable was added at the cornice line with a pointed-arch window in the gable. A Victorian single-story porch on brick piers was added across the width of the front of the house. The porch is straight, paralleling the front of the house across four bays and slants back toward the corner of the house on the fifth bay to resemble a wraparound porch. Five remaining free-standing porch supports are Queen Anne-style turned spindles. A sixth support is currently missing. One half support is attached to the wall of the house at each end of the porch. A frieze of turned spindles extends across the top of the porch, below which is a scalloped border shaped rather like a string of arrowheads. Throughout the house thus far the windows are two over two with louvered shutters on the second floor. Shutters on the first floor have been removed.

Prepare both a summary paragraph of significance and a general statement of history and support.

The H. William Tabler House has been evaluated under National Register of Historic Places Criteria A, B, C, and D. This evaluation was made according to the Maryland Historical Trust's Statewide Historic Contexts.

The Tabler House, located in the Piedmont section of the state, is potentially significant under National Register Criteria A and C. It is an excellent example of a once-prosperous farmstead. The area around Urbana is well-suited to farming. Settled to a large extent by thrifty German farmers from Pennsylvania, wheat, rye, corn, as, potatoes, and some tobacco were the primary crops. The property was well located to take advantage of the Frederick-Urbana Turnpike, one of the many turnpikes constructed in the early nineteenth century when the state focused on internal transportation improvements. After ca. 1830, the farm was well situated to take advantage of the recently completed Baltimore and Ohio Railroad, three miles away in Ijamsville. The farm is only seven miles from Frederick, which provided a market for the farm's produce. It is even closer to Hyattstown in Montgomery County, another potential market.

That the farm prospered may be seen in the additions to the main house that made it progressively larger and in the successive embellishments made to the house that obviously were designed to maintain a fashionable residence. The Tabler House exemplifies the history of nineteenth-century folk architecture in Maryland.

The Tabler family was an old and respected family in the Urbana area. They emigrated to the United States from Germany and took up agriculture in Frederick and Montgomery Counties. For a time in the early nineteenth century, Lewis Tabler, a descendant of the earlier emigres, and his family maintained a tavern in Hyattstown and manufactured whiskey, a more portable form for locally-grown corn. In his later years Lewis Tabler moved to Urbana where he became a prosperous farmer. When he died, he left a large estate and many slaves, which were divided among his sons. William Tabler, a son of Lewis Tabler, was a tavern-keeper, tanner, and farmer. Other Tabler sons became millers, saddlers, merchants, and farmers in the area. The family was prominent in Democratic circles and were members of the Methodist Episcopal Church of Hyattstown (Williams and McKinsey 1967:1539-1540).

The Tabler House retains its integrity of location, design, setting, workmanship, materials, feeling, and association.

2 DESCRIPTION (Cont.)

A modern two-story, one-bay-wide addition on a concrete block foundation has been added on the north end of the house. It appears to have been built in two stages. The first, one-room deep was attached at the front of the house; the second, also one-room deep, at the rear of the house appears to have been added later. Most of the windows in this addition have two over two lights placed horizontally. However, one sash on the northeast bay on both floors has six over six lights; the other has one over one laid horizontally. The windows on the end elevation of this addition are different sizes. That on the first floor at the rear is considerably larger than the other three windows. A small one-room shed with concrete foundation has been attached to the rear of the ell.

Behind the main house on the Tabler property is a two-story, wood-framed tenant house on a fieldstone foundation. On the north elevation is a large chimney. Originally it was fieldstone and the base remains fieldstone. It has been rebuilt from the shoulder up with bricks. There is one window on each floor on the two side elevations, and a door and one window on the second floor on the front elevation. The door and the windows are centered in each elevation. Windows vary from six over six to nine over nine to one single pane. The roof is clad in corrugated metal.

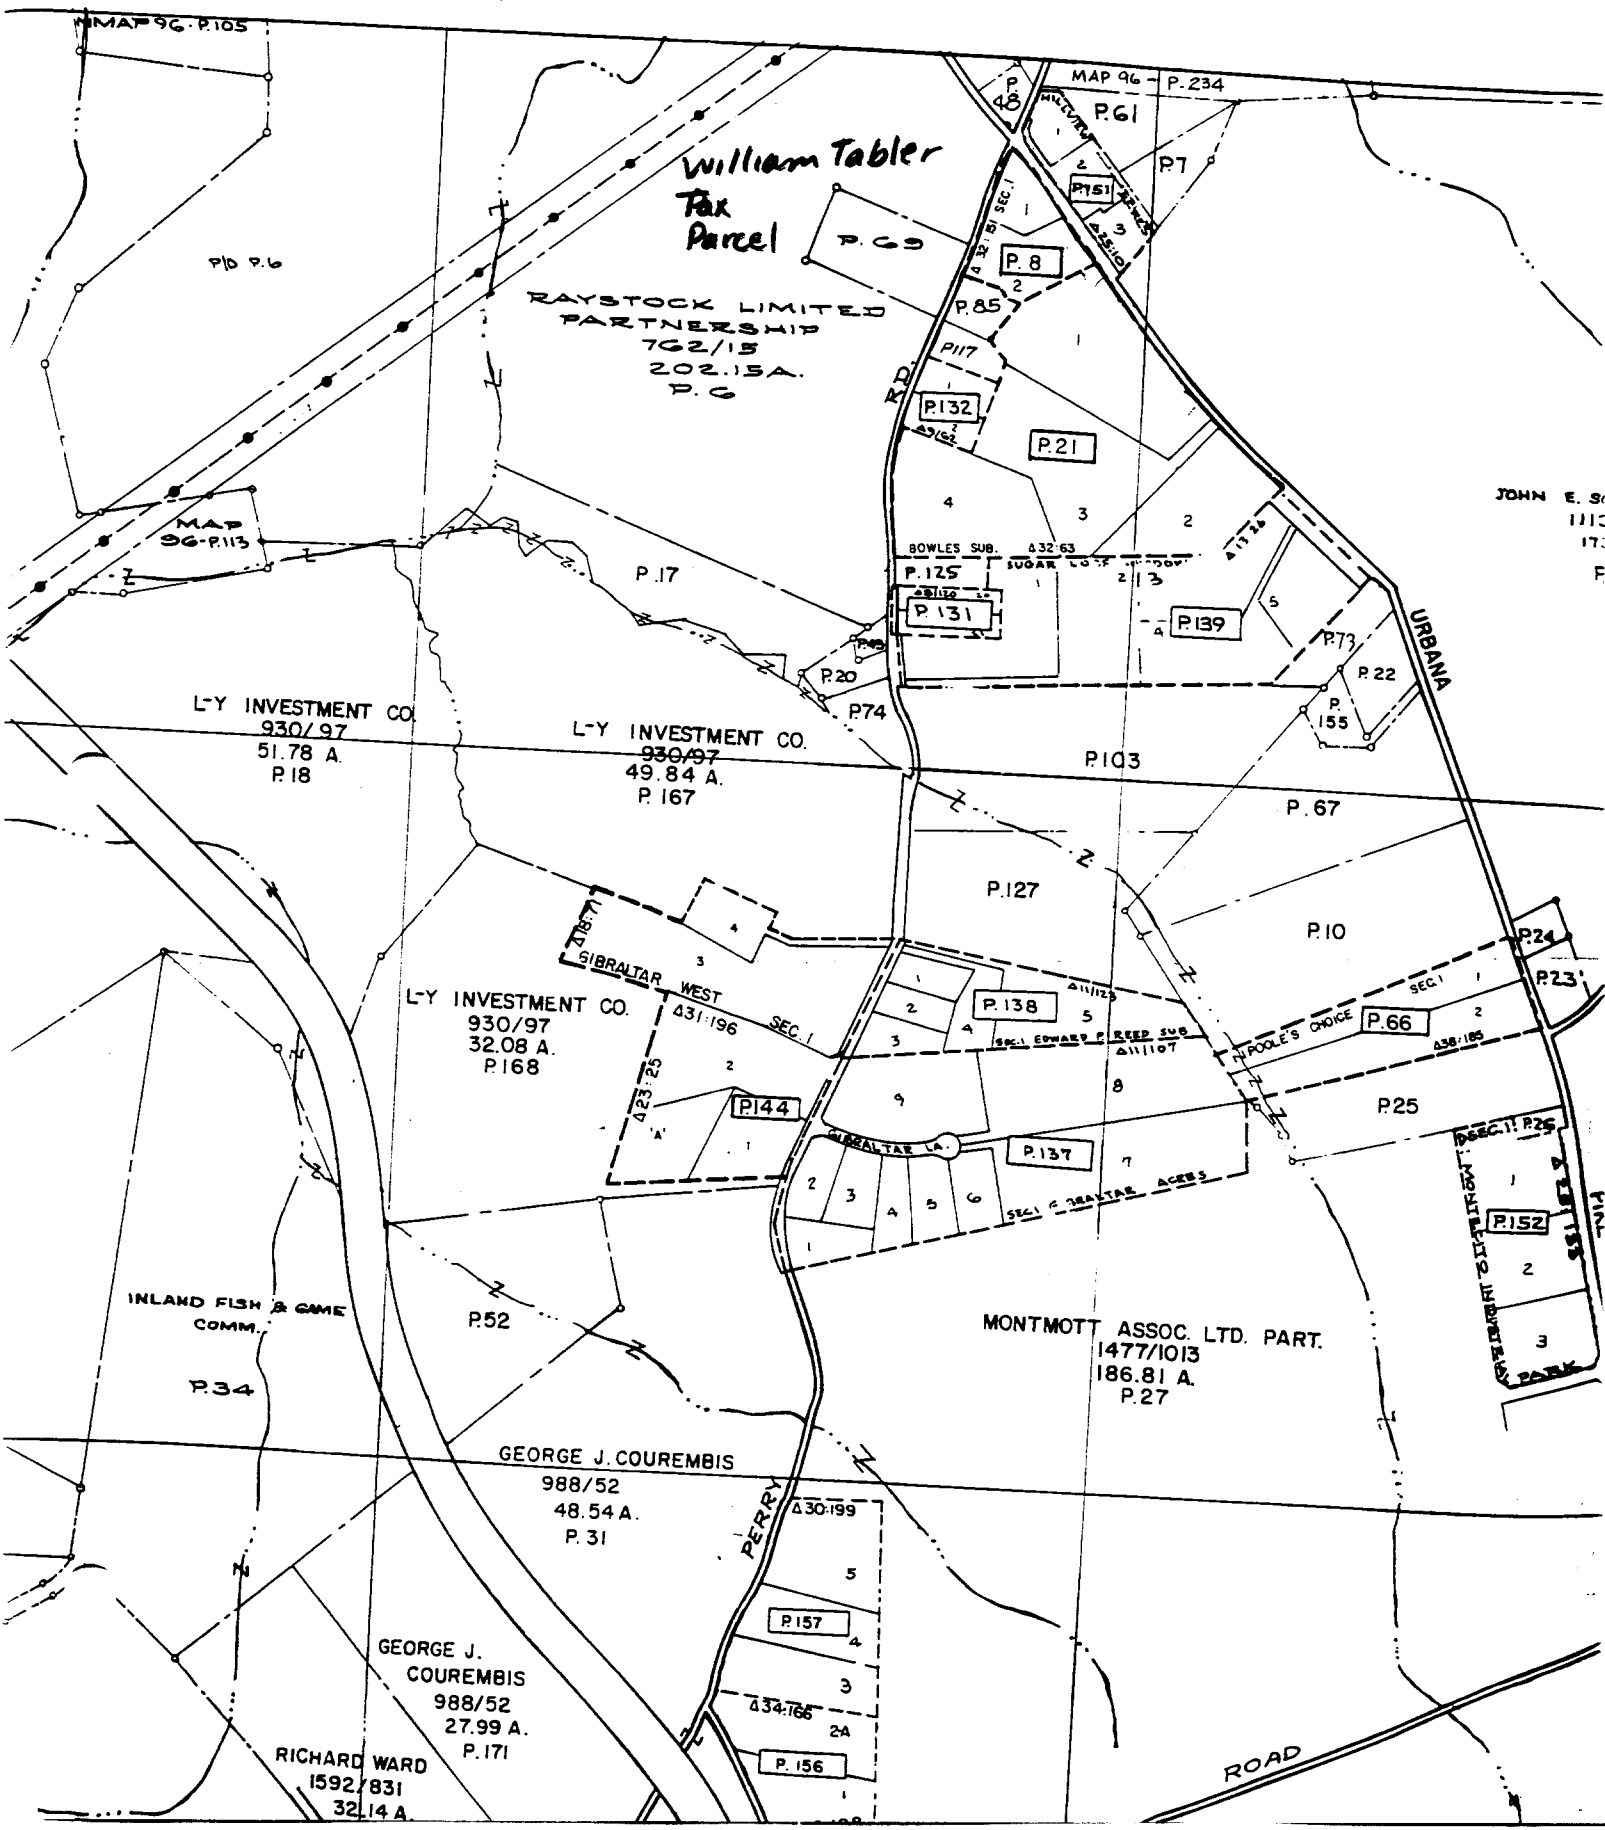

Also on the property is a small barn on cinderblock foundation. The building is sheathed in vertical boards. The roof is corrugated metal.
